

# Inspecting Tower Crane Temporary Devices

## BP 07

On any given job site, there are often various activities taking place alongside crane operations. As a result, there may be temporary signage, structures, and lights attached to tower cranes. Although these devices are not included in regular tower crane inspections, they must be checked regularly to ensure everything is in proper working condition and will not become a safety hazard. The following is an inspection checklist for temporary devices that may be found on a job site.

Item	Yes	No
Work task lights are functioning properly and attached securely to the jib or mast	<input type="checkbox"/>	<input type="checkbox"/>
Aeronautic warning lights are functioning properly and attached securely	<input type="checkbox"/>	<input type="checkbox"/>
