

ANSWER KEY: Converting fractions to decimals

1. $\frac{2}{6}$

Divide the top number by the bottom number.

$$2 \div 6 = 0.33$$

2. $\frac{9}{16}$

Divide the top number by the bottom number.

$$9 \div 16 = 0.56$$

3. $\frac{8}{10}$

Divide the top number by the bottom number.

$$8 \div 10 = 0.80$$

4. $\frac{1}{4}$

Divide the top number by the bottom number.

$$1 \div 4 = 0.25$$

5. $\frac{1}{100}$

Divide the top number by the bottom number.

$$1 \div 100 = 0.01$$

6. $\frac{10}{20}$

Divide the top number by the bottom number.

$$10 \div 20 = 0.50$$

7. $\frac{6}{20}$

Divide the top number by the bottom number.

$$6 \div 20 = 0.30$$

8. $\frac{5}{15}$

Divide the top number by the bottom number.

$$5 \div 15 = 0.33$$

9. $\frac{4}{25}$

Divide the top number by the bottom number.

$$4 \div 25 = 0.16$$

10. $\frac{2}{8}$

Divide the top number by the bottom number.

$$2 \div 8 = 0.25$$
